

Abstract of the Disclosure

An apparatus and a method for tracking time spent on one or more Internet sites. The tracked information may then be used
5 to generate detailed records containing the Uniform Resource Locators (URLs) of the sites visited, the exact time spent on each site, and a record of any downloads, file transfers, or other activities performed by the user. One or more reports may be generated from the detailed records and list the activity by
10 each user, tabulating the web site accessed and the time spent on that web site. This information may then be utilized to generate an invoice for the work performed. The reports may be generated are stored electronically, and may be accessed by an invoicing program which uses stored hourly rates in conjunction
15 with the information in the report to generate a detailed invoice for the client. The invention may be deployed on a personal computer, and enabled by a service operator who provides the time tracking and recouping system (e.g., a software means).
